

Combi Series Combined Electric Burn off and Curing Ovens

<http://www.whitelegg.com/products/electric-motor/electric-motor-rewind-and-repair/combi-series-combined-electric-burn-off-and-curing-ovens>

Modern, efficient closed loop, system for both burning off electric motors and curing the impregnation

- Very compact Closed Loop System- **no chimney required**. Maintenance involves cleaning of filters and changing water.
- Nitrogen fed into the chamber to prevent ignition and flames commonly associated with conventional burn off ovens - no need for a water supply.
- Can easily be used for curing solvent-less varnish and resin.
- Full control via Siemens PLC
- Supplied with a 1,000 kg capacity trolley with rails
- Much lower running costs than conventional burn off ovens
- No expensive installation required. Simple and intuitive plug and plug commissioning and operation.

Combi-12 with internal dimensions 100 x 100 x 120 cm (W x H x D)

Combi-30 with internal dimensions 120 x 120 x 200 cm (W x H x D)

Combi-60 with internal dimensions 180 x 180 x 180 cm (W x H x D)
