Complete line fixed depth tube expanders for **boiler** tubes

The **BH-CH-DH-series** fixed depth tube expanders have been designed for rolling boiler tubes. Evolved from the respective B-C-D-series that Maus Italia has produced and sold with great success for more than 50 years.

All the tube expanders of the **BH-CH-DH-series** can be driven by pneumatic, hydraulic and electric rolling machines with torque.

- **BH-series** tube expander with plane shoulder available in the standard version with 3 expansion rolls
- **CH-series** tube expander for rolling and flaring at 15°, available in the standard version with 3 expansion rolls and 3 flaring rolls.
- **DH-series** tube expander for rolling and flaring 15° inclination, available in the standard version with 3 expansion rolls and 3 flaring rolls. This is the improved version of the **CH-series** which gives a uniform result in rolling and flaring thanks to an adjustable stop.
- **F/602-series** tube expander for simultaneous rolling and beading of tubes in boilers .
